

Year 1

We will be exploring fiction and non-fiction texts focused on life under the sea. We will be identifying the similarities and differences between the text types.

In English we will be writing descriptions of different sea creatures, to help us produce descriptive poetry.

In art we will be creating observational drawings of objects from under the sea. The children will be drawing using different sketching pencils and learning how to add depth by shading.

In art we will also be making our own sea creature pictures by recycling plastic.

In dance we will be experimenting with a range of movements to imitate sea creatures.

In science we will be investigating the habitats of sea creatures and predators under the sea. We will also be learning about the effects of pollution on sea life.

We will be writing a fact file in English to share our learning with you.

In geography we will be locating oceans using atlases and learning their names. We will be learning that different oceans are different temperatures which determines the wildlife that lives there.

In science we will be finding out about different animal groups and will be using these to sort sea creatures.

Under the Sea
