

## **Family Friendly Minutes**

Meeting held on Tuesday 21<sup>st</sup> March 2023

The minutes from the previous meeting were agreed as a true and accurate record, all actions had been addressed.

Kate Woods (Curriculum Development Lead) led an enrichment session which was in three parts – Market Place, the assessment of foundation subjects and how curriculum developments link to the recent governors training. Kate described the progress made in project sequencing, the substantive knowledge expected in each subject, for each year group, and the many creative, immersive learning opportunities woven into teaching and learning. Kate also explained how 'Kahoot' was now being introduced to each year group as a tool to assess knowledge and understanding in foundation subjects (predominantly History and Geography) through a fun and interactive quiz.

Helena then shared the minutes from the recent Resources Committee Meeting – 07.03.23, on behalf of Matt Lamey.

The subjects included:

- Business car insurance for school staff attending courses and meetings
- The completed upgrade to the WiFi system
- The completion of the new adventure playground equipment
- The Budget report

The School Financial Values Standards were ratified for submission. One of the actions on the report was that the two newest governors on the resources committee undertake 'Financial Management in Schools' training.

Alison Millman then commented that the Whole Governing Body training session that had taken place last week on the subject of 'Moving from Good to Outstanding' had

been very interesting. She reported that she would distribute packs to those governors who had been unable to attend. As a result of the training, there will also be a review of governance which will include a needs assessment to ensure any gaps in knowledge are filled.

Finally, it was agreed that Stephen Ashe would be asked to arrange the next visit as the formula used for the last one was so successful. A visit will be planned for the summer term looking at the impact of the new facilities and its intention for use going forwards.
