

7th November 2023

Dear Parents and Carers,

As part of the children's project this half term, 'The Eighth Wonder of the World', the children are designing and building a model structure to be suited to a location in the world of their choice. As part of their design criteria, the children have to consider how they will make their building eco-friendly and sustainable for the future.

On Friday 1st December, the children will be having a 'Big Build' day where they will be spending time making their models. We would like to invite you to join us between 9:15am-10:30am and 10:45am-11:45am in the children's classrooms to look at the children's designs and help them to make their projects come to life by supporting them in making their model building.

Please do come and join us, if you are able to, at any point during the times above for as long or as little time as you are able to. We would warmly welcome any expertise and creative ideas; ways in which the children could ensure their building is suited to its location and for its purpose and ways to make the building more environmentally sustainable.

The children will then be presenting their work to an architect later on in the term whereby they will communicate their ideas, explaining the design choices they have incorporated to ensure their building or structure is suited to the location and purpose, how they have worked together as a team, their originality and uniqueness of design and the considerations they have made towards ensuring their building is eco-friendly.

The children have already shown passion and creativity in their initial ideas and would really welcome you coming to share any expertise you may have in the design and building process. If you are able to join us for all or some of the morning, please may you indicate on the Google form, link below, so that we are able to gain an idea of numbers to ensure we have set up enough space to work.

<https://forms.gle/rPj4QzXFnpbMQEXm6>

We look forward to sharing the children's work in action with you and seeing as many of you as possible throughout the course of the morning on Friday 1st December 2023.

Yours sincerely,

Mr Rolfe
Year 6 Team Leader
